

Your puppy's first vaccination package

At Stanhope Park Vets we want your puppy to have the best start in life to enable it to get out there and enjoy as many experiences and activities as possible. This includes disease prevention, parasite control, and microchipping (by experienced hands), as well as lots of information from our experienced staff about training and socialisation so you will have a happy, well educated, well trained dog.

Which of these is the right package for your puppy?
